

TABLE TOP TEMPERER

Table Top Temperer with Digital Temperature Readout

**A compact machine for melting and tempering chocolate
and compound coatings.**

Operates with 1 to 6 lbs. of chocolate or compound coating.

The improved ACMC Table Top Temperer features state-of-the-art electronic circuitry designed for efficient, reliable and durable continuous operation. It includes convenient digital temperature setting and readout.

- Molded ABS housing
- Injection moulded polyethylene scraper with molded-in probe retainer (dishwasher safe)
- 5-quart stainless steel bowl
- Bowl lifts out (additional bowls for other coatings available)
- Scraper snaps in and out of bowl (additional scrapers available)
- Front recessed control panel with:
 - DIGITAL TEMPERATURE READOUT
 - Thermostat controlled heating & cooling 70⁰ to 125⁰ F
 - Also available in Celsius
 - LED indicator lamps for heat & cool
 - Bowl motor control on/off switch on front panel
- Power entry module with fuse holder and IEC connector
- Uses 2 100-watt lamps as heat source
- Cooling fan is rated for continuous use
- Operates on 110 VAC (also available for 230 VAC)
- Clear Lexan night/dust cover
- Size: 12" high x 17" diameter
- Weight: 15 lbs. - ships via UPS
